

# TRUCK TANK

---

## REGULAR 24 TM BULK SUPPLY

---

### PRODUCT QUANTITY

---

The supply of grinding aids in bulk through truck tanks allows the distribution of volumes of additives up to 24,000 liters.

### DISTANCE

---

The supply of additive via tank trucks is available for the Iberian Peninsula, France, Italy, Belgium, Switzerland or the Netherlands, among others.

### TRANSIT TIME

---

The transit time of the additives delivered through tank trucks vary from 24-48 hrs for supplies to the Iberian peninsula, up to a maximum of 7 days for other European countries.

### TRANSPORT

---

The delivery of additives by tanker is available for transport:

- ✦ Land (road-Europe)

### ADVANTAGES

---

- ✦ High chemical stability, allowing 100% compatibility with the product. Also valid for cargo classified as ADR.
- ✦ Maximum cost-effectiveness of logistical costs for road transportation (€/Tm).
- ✦ Easy loading and unloading. Minimum handling cost in factory.
- ✦ Versatility. Allows the dispatch of several products in compartmentalized cisterns.
- ✦ Very quick supply.

***Tank trucks make a bulk liquid transportation system efficiently, safely and cost-effectively, minimizing the delivery time and the logistic costs for the supply of liquid additives.***
